

You're creative, communicative, and excited to put your skills into action in a tech-driven environment? Let's talk! 🚀

At fiveD, we're developing cutting-edge radar simulation solutions for autonomous mobility, smart home applications, and airport security scanners. Based in Erlangen, our interdisciplinary team works at the intersection of software, AI, and sensor tech – and we're growing fast. That's why we're looking for a creative and motivated student to support our marketing, communications, and event activities.

🎨 What you'll do:

Create presentations, flyers, and LinkedIn posts, edit images and videos using tools like InDesign or DaVinci Resolve, help organize events and trade shows, and support both internal and external communication. You'll also contribute to implementing our marketing strategy – your ideas are more than welcome!

🔧 What you bring:

You're enrolled in a degree program such as marketing, media, design, or a related field. You enjoy working creatively and in a structured way. You're confident using PowerPoint and Word, and ideally have experience with InDesign (or similar tools for image and video editing), Blender, and WordPress. Team spirit and reliability are just as important to you as they are to us.

💡 What we offer:

Flexible 10–15 hours per week, creative tasks with real responsibility, a supportive team in a growing high-tech company – Work on-site, with the option for remote work upon agreement.

📧 Interested? **Send your CV and some samples of your work to contact@five-d.ai** – we're excited to hear from you!
