

COLLABORATION & TECHNOLOGY

Working Student Software Development (m/f/d)

Job ID: 25-02 – Location Erlangen City Center and remote

We shape the future – with you!

In 2018, we founded an internal start-up with the mission of making the products of the industrial group Mitsubishi Heavy Industries smarter and more connected. Using agile methods and state-of-the-art software technologies, we develop solutions that shape the business models of tomorrow. Learn more: [Click here](#).

Would you like to help us write this story? Then apply now as a **Working Student Software Development (m/f/d)** and, starting immediately, shape the future with us for **15–20 hours per week** in the following role:

Your responsibilities – where you make an impact:

- Support a Scrum team in its daily work on **smart video management software using modern web technologies or computer vision applications based on artificial intelligence**.
- Identify what is state of the art and what truly excites our customers.
- Get to know the different roles in agile software development.
- Understand and critically question our core product features.

What we offer – your benefits:

- Start-up spirit with the security of a large corporation.
- Innovative work environment: A challenging, creative atmosphere with **maximum freedom to shape and influence**.
- Flexibility & freedom: **A remote-first culture** with a modern office as an inspiring collaboration space.
- Technical excellence: State-of-the-art equipment and complete freedom in choosing your development tools.
- Diverse projects: A wide range of application areas without legacy systems, challenging your creativity.
- Career boost: The opportunity to actively develop your know-how and contribute innovative ideas.

Your profile – what you bring:

- You are enrolled in a technical or scientific degree program, ideally in computer science, computational engineering, data science, or a related field. We also welcome applications from students at the very beginning of their studies!
- You are self-motivated and driven to move both yourself and your environment forward.
- Team spirit comes naturally to you.
- You have very good English skills, both written and spoken.
- Creativity and structured working methods are not contradictions for you.

Ready to take your skills to the next level?

- Send us your CV at **hr@ds.mhie.com**. We look forward to getting to know you!
