

Participant for study of visual attention

What:

We are looking for participants for a **study on visual attention**. The study involves a motion discrimination task on a **computer screen**. While you perform the task, we record eye movements, accuracy and reaction time. Thereby, we want to find out how your attention changes influences motion perception.

Who:

You can take part in the study if want to support scientific research and earn a small amount of extra money. We are looking for people who:

- Are at least **20 years old**
- Have **normal or corrected sight** (glasses, contact lenses, etc.)
- Have no history of **neurological** or **current mental disorders** (Migraine, Epilepsy)
- Are available for **three different sessions** on different days. On the first appointment you will have a **training session** to get familiar with the task. On the two following **experimental sessions** you will perform the task regularly.

Payment:

Participants will receive a compensation of **8 Euros per hour**.

Where & When:

The study takes place at the **German Primate Center** (Hans-Adolf-Krebs-Weg 7, 37077 Göttingen). Appointments for the session will be scheduled via email. Each session lasts approximately **1 to 1.5 hours**.
