

Movement Observation Study

What is it about?

The Klinik und Poliklinik für Neurologie at Universitätsklinikum Hamburg-Eppendorf is looking for volunteers for our movement observation study.

The study includes **one test session** of approximately 3 hours. This is a pilot experiment and testing will take place **between December 10 and December 23 at UKE in building W34.**

If the pilot is successful future dates will be posted shortly.

The study is compensated with an **expense allowance of 40 € for the participation.**

The study is structured as follows:

During the study we will ask you to watch a series of videos. The videos will show a person interacting with an object. Your main task will be to report when you believe the person is fearful of the object. At the end of the study, we will ask you to fill-in some questionnaires.

How does the participation work?

You may participate to the study if:

- You are between 18 and 40 years old.
- You are right-handed.
- You have not been diagnosed with a neurological or psychiatric disorder.
- You don't have any motor difficulties.
- Speak and read English fluently
- Did not participate in our previous 'Movement Study' (November 2023 - March 2024) or our previous 'Movement Observation Study' (November 2024 - December 2024; June-August 2025)
-

If you meet the above criteria and are willing to participate – or if you have any questions about the study - please send an email to **valeria.simonelli@hotmail.com** , with the subject “Movement observation study - December 2025”
