

Unlock Your Mind's Potential! ? Participate in a Sequential Memory Task - Earn 85€+!

Online seit 01.10.2024 | 2024-10-01-892363 | Sonstige

Stellenbeschreibung

Study Duration and Compensation:

- Embark on two sessions (100 and 80 minutes).
- Score a 10 Euro show-up fee plus 15 Euro/hour for your time.
- Bonus alert! Complete both sessions with flying colors for an extra reward.

What's the Buzz?

Have you ever wondered what's cooking in the neural kitchen of healthy brains? We're on a mission to uncover the secret neural underpinnings of memory in both the youthful and the wise, enhancing our understanding of healthy aging.

Session Breakdown:

- Session 1: Dive into questionnaires, instructions, and practice. Spend around 100 minutes in the MRI scanner, completing cognitive tasks or resting in stillness for detailed brain snaps. All you need to do? Memorize some transitional sequences and hit those keys for a series of brainy decisions.
- Session 2: Similar to the first, but with a breezy 20-minute warm-up before the MRI scanner.

When and Where?

- Sessions may be 1 to 3 days apart or on the same day with a break (depending on the MRI availability at UKE).

Ready to Jump In?
