Stellenbeschreibung

Hello!

We would like to invite you to participate in a visual psychophysical experiment with eye-tracking and MRI (Magnetic Resonance Imaging). The experiment consists appointments in **9 different days**, 3MRI and 6 behavioral sessions.

Exact times for the individual dates can be arranged individually after application. During the experiment you will perform a visual task on a computer, like in an old computer game. **You will receive €12 per hour for behavioral and €15 per hour for MRI sessions as compensation for your participation and an additional bonus depending on your performance.**

The experiment will take place on the North Campus.

Anforderungsprofil & Qualifikationen

To participate this experiment, you should

- Be between 18-55
- Speak and understand English
- Not have fundamental neurological and/or psychiatric disorders.
- Do not have claustrophobia or is not uncomfortable in narrow places (i.e. elevators)

If you are interested in participating the experiment, **please send an e-mail stating whether you full-fill the conditions and which week you would like to participate.**

Best,
Beyza
